Welcome to

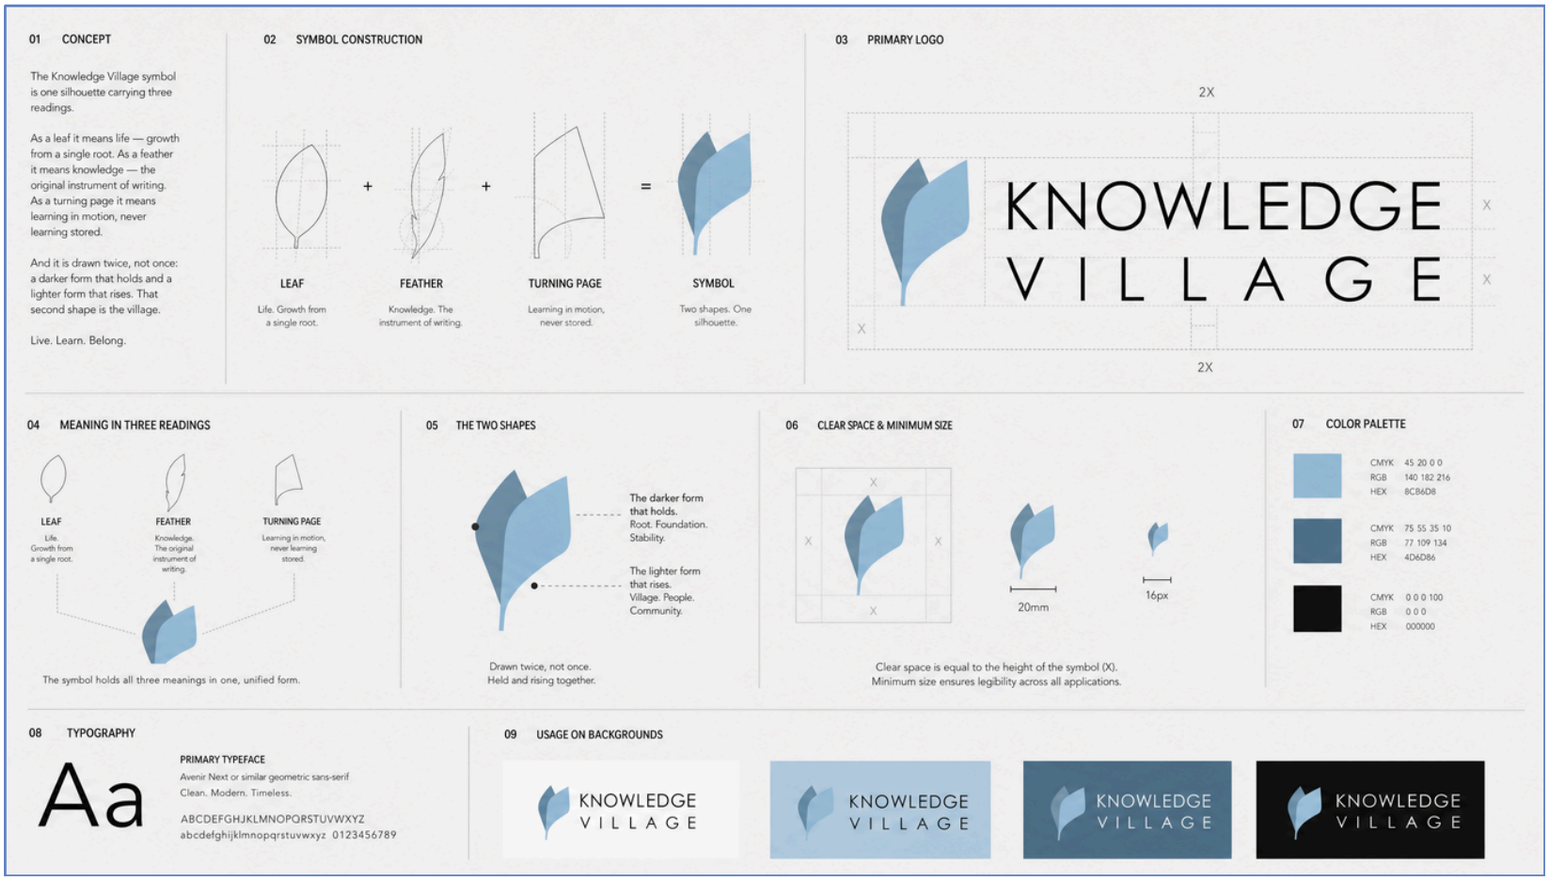

KNOWLEDGE
VILLAGE

LOGO CONSTRUCTION

The Knowledge Village symbol is one silhouette carrying three readings. As a leaf it means life — growth from a single root. As a feather it means knowledge — the original instrument of writing. As a turning page it means learning in motion, never learning stored.
And it is drawn twice, not once: a darker form that holds and a lighter form that rises. That second shape is the village.
Live. Learn. Belong.

LOGO APPLICATIONS

OFFICE WORK

The Knowledge Village symbol is drawn as flat, solid colour. It carries no gradient, no transparency, no shadow and no photographic element. This is deliberate. Correspondence is the most reproduced surface a brand has — letterheads, envelopes, contracts, invoices and handover documents are printed, copied, scanned and re-printed for years — and the mark is built to survive every one of those passes unchanged.

LOGO APPLICATIONS

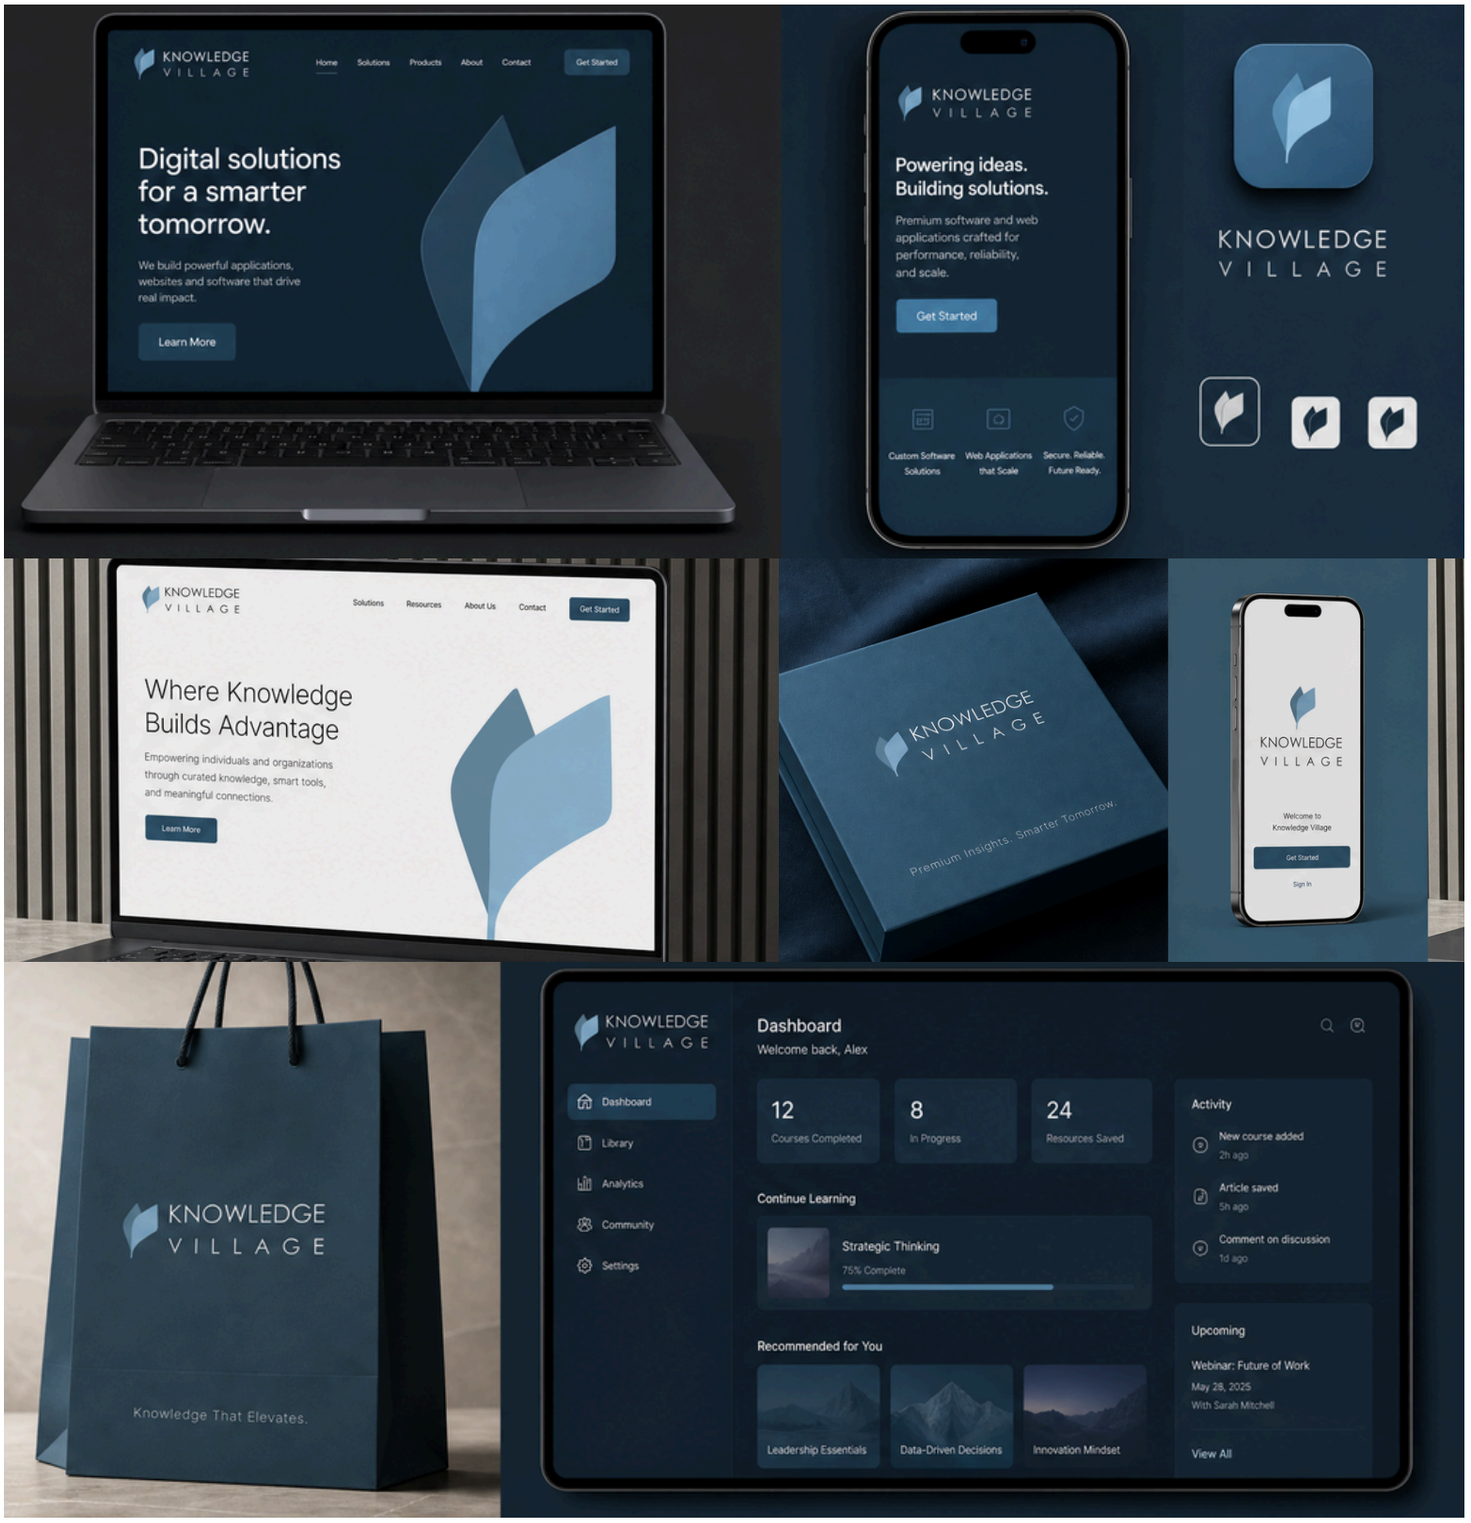

REAL ESTATE

Property is sold outdoors. A development is announced on a hoarding, navigated by a monument sign, and remembered by the mark on the crown of the building. The Knowledge Village symbol was drawn for viewing distances measured in metres, not centimetres.

LOGO APPLICATIONS

software

The Knowledge Village symbol is pure vector geometry — two closed paths, two flat fills, nothing else. It carries no gradient, no blur, no shadow and no raster component. As an SVG it is a file of a few kilobytes that renders identically on every browser, every operating system and every pixel density, from a low-end Android handset to a retina display to a 4K sales-centre screen.
